

Mohamed Yassine, MD
Head of U.S. Medical Affairs,
Patient Value Operations

Mohamed Yassine, MD is the Head of U.S. Medical Affairs, Patient Value Operations. Leading UCB's U.S. medical community, Dr. Yassine also oversees UCBCares®, facilitates cross-patient value unit consistency and best practices, and governs core medical activities. He directs efforts to provide value to patients with autoinflammatory, bone, and neurological diseases through partnering with external stakeholders in education and research collaborations.

Dr. Yassine has been in the biopharmaceutical industry for more than 18 years in various leadership roles in medical affairs and clinical development. He has extensive experience in product development, launching more than 12 therapeutic products spanning over 10 therapeutic specialties with a focus on immunological-based diseases.

Dr. Yassine is a medical doctor, and before joining the pharmaceutical industry, he worked at the University of Illinois at Chicago in the hematology/oncology division with a specific focus on bone marrow transplant research.
